

Ilyass BOUISSA

IT Buyer — Software & Hardware

bouissailyass@gmail.com | +33 6 95 50 90 33 | [LinkedIn](#) | [Portfolio](#)

PROFILE

My technical experience allows me to understand business and IT requirements, assess supplier proposals in greater depth and contribute to complex tendering processes, including within a public procurement environment. I am looking to further specialize in technology procurement and build long-term expertise in IT sourcing and supplier management.

EDUCATION

Specialized Master's in Purchasing – Grenoble Ecole de Management Sep. 2025 – Sep. 2026

- Procurement processes, contracting, negotiation and TCO, risk management, compliance and Incoterms

Master's Degree in MIAGE – Grenoble Alpes University Sep. 2022 – Sep. 2024

- Information systems, software architecture, GDPR, cybersecurity and project management

PROFESSIONAL EXPERIENCE

La Poste Groupe – IT Buyer Sep. 2025 – Nov. 2026 (Apprenticeship)

- Leading a European tender for a SoftPOS solution aimed at consolidating requirements across several Group entities: preparation of tender documentation, definition of selection criteria, development of technical, commercial and ESG evaluation frameworks, and supplier bid comparison.
- Managing the procurement of enriched datasets: gathering internal requirements, comparing supplier proposals, conducting negotiations and supporting contract implementation.
- Contributing to tenders for various software solutions, including IoT monitoring platforms, audit tools and digital inspection solutions.
- Contributing to a tender covering Bluetooth Low Energy (BLE) IoT solutions and IT equipment for educational purposes.
- Conducting technology watch and supplier sourcing at industry events including SIDO, focused on IoT technologies, and Retail Tech.

Capgemini Engineering – Project Coordinator & Software Engineer Sep. 2022 – Feb. 2025 (Apprenticeship)

- Managed software projects including business requirements gathering, solution assessment, planning and backlog monitoring.
- Developed and integrated Data/AI algorithms into internal applications using Angular and Spring Boot.

Rakuten – Software Engineer May 2022 – Aug. 2022 (Internship)

- Worked cross-functionally with Product and Data Science teams.
- Developed a Java/Spring advertising pipeline and contributed to its deployment on Google Cloud Platform using Kubernetes and Docker.

Personal Project – Bmarket — [bmarket.fr](#) Feb. 2024 – Present

- Designed and developed an e-commerce web application with an administration dashboard used to monitor order-related KPIs.
- Assessed actual business requirements to minimize hosting, API and domain-related costs.
- Implemented an automated CI/CD deployment architecture hosted on a Virtual Private Server (VPS), optimizing infrastructure costs and application scalability.
